Concussion Management

A concussion is a disturbance in the function of the brain that can be caused by a blow to the body or head and may occur in any sport or activity. Effects of a concussion may include a variety of symptoms (headache, nausea, dizziness, memory loss, balance problem) with or without a loss of consciousness. I/we understand there is a concussion management protocol established that includes care and return to play criteria.

I have examined the above-named student and completed the preparticipation physical evaluation. The athlete does not present apparent clinical contraindications to practice and participate in the sport(s) as outlined above. A copy of the physical exam is on record in my office and can be made available to the school at the request of the parents. If conditions arise after the athlete has been cleared for participation, the physician may rescind the clearance until the problem is resolved and the potential consequences are completely explained to the athlete (and parents/guardians).

CONCUSSION IN SPORTS

A Fact Sheet for Athletes and Parents

WHAT IS A CONCUSSION?

A concussion is an injury that changes how the cells in the brain normally work. A concussion is caused by a blow to the head or body that causes the brain to move rapidly inside the skull. Even a "ding," "getting your bell rung," or what seems to be a mild bump or blow to the head can be serious. Concussions can also result from a fall or from players colliding with each other or with obstacles, such as a goalpost.

WHAT ARE THE SIGNS AND SYMPTOMS OF A CONCUSSION?

Observed by the Athlete

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Bothered by light
- Bothered by noise
- Feeling sluggish, hazy, foggy, or groggy
- Difficulty paying attention
- Memory problems
- Confusion
- Does not "feel right"

Observed by the Parent / Guardian

- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows behavior or personality changes
- Can't recall events after hit or fall
- Appears dazed or stunned

WHAT TO DO IF SIGNS/SYMPTOMS OF A CONCUSSION ARE PRESENT

Athlete

- TELL YOUR COACH IMMEDIATELY!
- Inform Parents
- Seek Medical Attention
- Give Yourself Time to Recover

Parent / Guardian

- Seek Medical Attention
- Keep Your Child Out of Play
- Discuss Plan to Return with the Coach

It's better to miss one game than the whole season.

Give yourself time to get better. *If you have had a concussion, your brain needs time to heal. While your brain is still healing, you are much more likely to have a second concussion. Second or later concussions can cause damage to your brain. It is important to rest until you get approval from a doctor or health care professional to return to play.*

RETURN TO PLAY GUIDELINES UNDER SB137

1. Remove immediately from activity when signs/symptoms are present.
2. Must not return to full activity prior to a minimum of 240 hours (10 days).
3. Release from medical professional required for return.
4. Follow school district's return to play guidelines.
5. Coaches continue to monitor for signs/symptoms once athletes return to activity.

Students need cognitive rest from the classroom, texting, cell phones, etc.
